Output B Port

# Jumpr Slate 10k ™ User Manual

## Specifications
Model: JU-SLATE-10K
Battery Cell: Lithium-ion Polymer
Power Capacity: 10000mAh(37Wh)
Recharging Cycle: 500 cycles
Output A: 5V/2.4A
Output B: 5V/2.4A
Input: 5V/0.5~2.0A(self-adapt)
Weight: 0.77lb (350g)
Dimensions: 8.39 x 5.47 x 0.26 inch (213.0 x 139.6 x 6.7 mm)
Operating Temperature: 32°F ~ 104°F (0°C ~ 40°C)
Storage Temperature: 14°F ~ 122°F (-10°C ~ 50°C)

## How to Charge
Charge the Jumpr Slate 10K with a micro USB cable from any associated power source. During charging the LED Battery Indicator will flash. Once charged, four solid LED lights will indicate the Jumpr Slate 10K is fully charged.

To charge your electronic devices using the included USB cable simply connect that cable to the USB interface on the Jumpr Slate 10K then connect the cable to the desired device; once connected press the power button to begin charging.

(If the Jumpr Slate 10K doesn't begin charging your device immediately, please make sure the Slate is charged before reconnecting)

**Output A:**
Specialized output for iDevices, also compatible with all USB enabled devices.

**Output B:**
General devices output.
